## **COVID-19 Pfizer Vaccine for Children Ages 5 and up – Now Available in Grant County**

Grant County, WA – Children ages 5 – 11 are now eligible to receive an age-appropriate dose of the COVID-19 Pfizer vaccine in Grant County.

“We are excited to share that our medical partners in our community now offer COVID-19 vaccines for ages 5 and up. Since March 2020, children have refrained from most in-person activities. This is such an exciting time with the upcoming holiday season! Last year was somewhat gloomy, but this year there is so much hope. Now we have vaccines available for just about everyone,” said Theresa Adkinson, Grant County Health District Administrator.
