## **COVID-19 Testing and Vaccinations Offered at GCHD Every Saturday in October**

Grant County, WA – The Grant County Health District partnering with Medical Teams International to offer COVID-19 vaccines and testing each Saturday in October.

“We are excited to partner with Medical Teams International to offer vaccinations, as well as COVID testing. With our pharmacies, clinics and hospitals hitting capacity on vaccines and testing, we hope these services will provide some relief for them, as well as our community,” said Theresa Adkinson, Grant County Health District Administrator.

Free COVID-19 testing as well as Johnson & Johnson, and Pfizer vaccines will be offered each Saturday in October from 10:00am-2:00pm at 1038 West Ivy in Moses Lake Washington. Booster Pfizer doses will not be offered at the October 4<sup>th</sup> event, but GCHD is hopeful to offer the booster soon.

“We will be right here at the Grant County Health District each Saturday in October. There is no cost for vaccines or testing and no insurance needed,” added Alice McMartin, Grant County Health District Vaccine Coordinator.

GCHD is working with partners to offer testing and vaccinations in other locations in Grant County as well. Follow GCHD on our web site, Facebook, Twitter and Instagram for the latest information on upcoming events.
